DETAILED ACTION

This action is responsive to applicants' amendment and response received October 9, 2003. Claims 17-22, 24-27, 29-33, 35, 39, and 40⁴³⁻⁴⁵ are currently pending.

Response to Amendment

1. The amendment filed October 9, 2003 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: Though the examiner acknowledges that applicants' preferred embodiment of their process is a "washing process," the specification does not provide explicit basis for a non-flotation process. Note that page 21, example 11, of the specification uses a flotation process and so applicants clearly envision their invention as being used in a flotation process. Applicant is required to cancel the new matter in the reply to this Office Action. For the present, the prior art rejections will be withdrawn, however they will be reinstated upon the cancellation of the new matter.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are

Art Unit: 1751

such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 17-22, 24-27, 29-33, 35, 39, 40, and 43⁴⁵ are rejected under 35 U.S.C. 103(a) as being unpatentable over Calmanti et al, US 4,360,439.

Calmanti et al teach a washing process for de-inking waste paper (see abstract). An example of such a composition comprises a C16 E25 alcohol ethoxylate (col. 10, example 8). The ethoxylated alcohols may be present in amounts as high as 60% by weight of the total surfactants (col. 10, claim 1). It would have been obvious to one of ordinary skill in the art to prepare a composition containing at least 50% of the ethoxylated alcohol of example 8 as such proportions are taught as preferred in the compositions of Calmanti et al.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period

Art Unit: 1751

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
